

CURRICULUM VITAE

I am a dedicated and versatile Full Stack Developer with a solid foundation in web development and a wide range of technical skills acquired through a one-year Coding Traineeship with IT Career Switch Ltd. During this program, I gained proficiency in core technologies such as HTML5, CSS3, JavaScript, PHP, SQL, React, jQuery, Python, Node.js, Bootstrap, and Git, which I utilized in developing mobile-first applications that meet real-world specifications. Additionally, I have hands-on experience with more advanced tools like Lua, C#, Bash, and Redux, further expanding my technical toolkit.

I successfully completed two significant projects, including "Gazetteer," a map-based app integrating third-party APIs for real-time country data, and "Company Directory," a SQL-driven personnel database. Both projects emphasized my ability to deliver high-quality solutions within set deadlines while ensuring functionality, usability, and client satisfaction.

My strong work ethic, combined with practical experience across various industries, equips me with a unique blend of problem-solving, adaptability, and collaboration skills. I am now seeking a role where I can continue to grow as a developer and contribute my expertise to create impactful digital solutions.

PERSONAL DETAILS

NAME: Ayo Alabi

RESIDES: South Croydon

TRANSPORT: Provisional license no vehicle

RIGHT TO WORK: British Citizen

CODING TRAINEESHIP

IT Career Switch Ltd
Coding Traineeship – Full stack developer
1-year program

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Python, Node.js, Bootstrap
- Command line Git, Github
- Remote API access

ADDITIONAL TECHNOLOGIES:

- Lua, C#, Bash, Redux

DEVELOPMENT EXPERIENCE:

Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio: <https://ayoalabi.co.uk/>

Portfolio Project #1: "Gazetteer"

The specification was to reply to a website specification for a map-based app to provide information on countries, with a focus on a "mobile-first" development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

Portfolio Project #2: "Company Directory"

A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a "mobile-first" application to maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error-free.

CAREER HISTORY:

Sep 2024 – Present
POSITION HELD:

K.A.T. Transport
Personal Assistant

- Ensured that children with special educational needs returned to school in a safe and timely manner
- Saw the children off to school, as well as accompanying them to their homes
